

Connect Facebook Account and Set Up Facebook Ads

Training asset package with source-grounded notes and marked-up screenshots.

Annotated Screenshots

The image shows a Google Docs interface with a document titled "Facebook Ads source document". The document content includes a lesson title, a description of the guide's purpose, and two numbered steps. Step 1 is "Facebook Page Requirement:" and Step 2 is "Connect your Facebook Page to the Loan Factory system". A screenshot of the Loan Factory system interface is included, showing the "Facebook Ads" section. The sidebar on the right contains a Claude AI chat window with a "Sonnet 4.6" model. The chat window has a "Take actions on Docs" section with buttons for "Summarize and analyze document", "Suggest edits to improve writing", and "Transform doc to executive briefing". A "HIGH RISK" warning is displayed, stating "Claude can take most actions on the internet now. This setting could put your data at risk. See safe use tips". The chat window also has a "How can I help you today?" prompt and a "Act without asking" button.

Lesson title

INSTRUCTIONS: CONNECT FACEBOOK ACCOUNT & SET UP FACEBOOK ADS ON LOAN FACTORY SYSTEM

This guide helps Loan Officers connect their Facebook Page to the Facebook Ads feature on the Loan Factory system. Additionally, it helps Loan Officers resolve common connection errors on the system.

1. Facebook Page Requirement:

Loan Officers must have a Facebook business page to run ads, not just a personal profile. If you do not have one, you need to create it first. You can manage multiple pages through your personal profile.

2. Connect your Facebook Page to the Loan Factory system

Step 1: Access the Facebook Ads path

Access the Facebook Ads tool in the left menu (follow the steps below) or go to the link www.loanfactory.com/facebook_ads

Step 2: Connect with Facebook

Screenshot step area

Facebook Ads

Connect with Facebook

Step 1: Create a Facebook Business Page

Log into Facebook:

Access this link, then use your personal email or phone number to create a Facebook Profile account if you don't have one. Make details are correct to avoid issues later.

Take actions on Docs

Summarize and analyze document

Suggest edits to improve writing

Transform doc to executive briefing

HIGH RISK: Claude can take most actions on the internet now. This setting could put your data at risk. See safe use tips

How can I help you today?

Act without asking

Claude is AI and can make mistakes. Please double-check responses.

Loan Factory LO Development Platform

Training Asset Package: Connect Facebook Account & Set Up Facebook Ads

Source Document: Instructions set up Facebook Ads from the Loan Factory system.docx **Reviewed by:** Jeremy McDonald | jeremy.mcdonald@loanfactory.com **Last Edit:** January 16 (IT Team) **Document Length:** 15 pages

\---

1\. SOURCE DIGEST

What This Document Teaches

This document walks a Loan Officer through the complete process of connecting their Facebook Business Page to the Loan Factory system so they can run Facebook Lead Ads from inside the platform. It covers the initial Facebook Business Page requirement, the four-step connection process inside the Loan Factory system, how to create and launch an ad campaign using pre-built templates, how to receive leads automatically in the Loan Factory pipeline, and a full troubleshooting section for the most common connection failure.

Who It Is For

Loan Officers at Loan Factory who want to generate leads through Facebook advertising using the built-in Facebook Ads tool on the Loan Factory platform. It assumes the LO already has a Loan Factory system login. It does not assume they have a Facebook Business Page set up yet.

Where It Belongs in the LO Development Platform

This lesson belongs in the Marketing and Lead Generation track, specifically within the section on Digital Advertising and Paid Lead Channels. It sits after foundational marketing setup lessons (Google Reviews, website settings) and before advanced pipeline automation lessons. It bridges the gap between having a Loan Factory account and actively generating inbound leads.

Exact Loan Factory Tool or Page Being Taught

\- Tool: Facebook Ads (found inside the Loan Factory system) \- Direct URL: www.loanfactory.com/facebook_ads \- Navigation path: Marketing Features \>\> Facebook Ads \>\> Connect with Facebook

Screenshots and Visual Steps Shown in the Document

The document includes visual step-by-step screenshots covering: the Facebook Ads landing page inside Loan Factory with the "Connect with Facebook" button highlighted; the Facebook Ads Config screen showing the "Get leads from Facebook ads" toggle and "Connect to Facebook Account" button; the Meta OAuth "Continue as \[user\]" authentication window; the Facebook Page selection screen ("Opt in to current Pages only" highlighted); the permissions review screen listing what access the system will receive; the "Continue \>\> Save \>\> Got it" sequence for granting permissions; the post-connection success view showing Ad account selection, Facebook page linkage, Default Loan Officer assignment, and Submit button (numbered callouts 1, 2, 3); the connection failure pop-up window with error message; the ad creation interface showing Lead Form and Website Traffic tab options; the ad template selection gallery showing templates including Rocket_OnePlus_1, TSAHC-Texas, Refinance 1, and HELOC; the budget and schedule entry screen (suggesting

\$5-\$10/day to start); the target audience selection screen (State, Language, Detailed Targeting fields); the final Facebook Ads dashboard showing active campaigns with status, daily budget, leads, and campaign name columns; the Leads pipeline showing leads tagged "Automatically Created"; a side-by-side "Before convert / After converted" screenshot showing the Facebook menu change when a personal profile gains Business Page access; and five troubleshooting screenshots walking through the Facebook Page Settings path to grant admin access to a secondary account.

\---

2\ STEP-BY-STEP WALKTHROUGH

Goal

Connect your Facebook Business Page to the Loan Factory system and launch your first Facebook Lead Ad so that new leads flow automatically into your Loan Factory pipeline.

Who This Is For

Any active Loan Factory loan officer who wants to run paid Facebook ads and receive leads directly inside their Loan Factory account.

Before You Start

You must have a Facebook Business Page. A personal profile alone will not work. If you only have a personal profile, you need to create a Facebook Business Page first. You can manage multiple pages through your personal profile, but the page itself must exist before you begin this process.

Required Accounts

A Loan Factory system login and an active Facebook Business Page are both required. A personal Facebook account that owns or has full admin access to the Business Page is also required.

Exact Navigation Path

Log into your Loan Factory account. In the left menu, click Marketing Features, then click Facebook Ads. You can also go directly to www.loanfactory.com/facebook_ads.

\---

Step-by-Step Instructions

Step 1 - Access Facebook Ads in the Loan Factory System

Log into your Loan Factory account. In the left navigation menu, click Marketing Features, then select Facebook Ads. You can also go directly to www.loanfactory.com/facebook_ads. You will land on the Facebook Ads page. Click Connect with Facebook.

Step 2 - Connect Your Facebook Profile Account

On the Facebook Ads Config screen, toggle on "Get leads from Facebook ads." Then click the "Connect to Facebook Account" button on the right side of the screen. A Meta authentication window will appear. If you are already logged into Facebook, you will see your name with a "Continue as \[Your Name\]" option. Click it. If you are not logged in, log in first, then continue.

Step 3 - Grant Page Access and Permissions

Facebook will ask you to choose which Pages you want to connect. Select "Opt in to current Pages only" and choose your Business Page. Click Continue. Facebook will then show you a permissions review screen listing what the Loan Factory system will be allowed to do (manage ads, access leads, read page content, etc.). Click Save, then click "Got it" to complete the authorization.

Step 4 - Successfully Connected - Configure Your Settings

After the connection succeeds, the Loan Factory screen will update to show the connected account. You will now see three numbered actions to complete. First (labeled 1), click the Ad account dropdown and select your Facebook Ad account. Second (labeled 2), confirm or select the Default Loan Officer for new leads - this is who receives the leads generated by ads. Third (labeled 3), click Submit.

If a pop-up appears saying "You must create a Facebook page in order to run Facebook ads," the connection has failed. Go to the Troubleshooting section below.

Step 5 - Create Your First Ad

Once connected, click "Create New Facebook Ad." Choose your ad type. Two options are available: Lead Form (captures the lead's contact info directly on Facebook) or Website Traffic (sends the user to your site). Select an ad template from the gallery. Templates include Rocket_OnePlus_1, TSAHC-Texas, Refinance 1, HELOC, and others. Click Select on the template you want.

Step 6 - Set Budget and Schedule

Enter your daily budget. The document recommends starting with \$5 to \$10 per day. Choose your Facebook Page to run the ad from. Set any other schedule settings you want, then continue.

Step 7 - Select Your Target Audience

Set your target State, Language, and any Detailed Targeting you want (such as home real estate interests). You can also enable a notification to your cell phone when a new lead is created. Click Submit.

Step 8 - Confirm Your Ad Is Running

Your ad campaign will appear on the Facebook Ads dashboard inside Loan Factory. You will see columns for On/Off status, Facebook Ads name, Daily Budget, Leads count, Amount Spent, Campaign name, and Status. A green "Active" tag confirms the ad is live.

Step 9 - Receive Your Leads

Leads from your Facebook Ads are automatically brought into your Loan Factory pipeline. The lead source will be tagged as "Automatically Created." You will see them in your Leads pipeline immediately after a lead submits their information through the ad.

\---

Common Mistakes

Using a personal Facebook profile instead of a Business Page is the most common reason the connection fails. Connecting a Facebook account that does not have admin access to the Business Page is the second most common error - the system requires the account used to connect to be an admin or full-control owner of the page. Closing the browser tab during the ad submission process can cause an incomplete submission. Do not close the tab until you see the confirmation that the ad has

been created.

How to Know It Worked

The Facebook Ads Config screen will update to show your connected Facebook page name and ID in the Facebook page section. Your Ad account will be selectable from a dropdown. After you create an ad, it will appear in the dashboard with an "Active" status. Leads will begin appearing in your pipeline tagged as "Automatically Created."

What to Do If It Fails

If you receive the pop-up error "You must create a Facebook page in order to run Facebook ads," it means the Facebook account you used to connect does not have full admin access to the Business Page. You need to add a different Facebook account as a temporary administrator of your Business Page with full control, then use that account to grant full admin rights back to your personal account. The troubleshooting section of this document walks through this process in five detailed steps using Facebook's Settings & Privacy \> Page Setup \> Manage and View Access path.

When to Ask LO Support or Marketing for Help

Contact LO Support at it.dept@loanfactory.com if the connection error persists after completing the troubleshooting steps. Contact the Marketing team if you need help selecting the right ad template for your market, setting audience targeting, or understanding ad performance data.

\---

3\. TRAINING MODULE VERSION

Lesson Title: Connect Your Facebook Account and Launch Your First Facebook Ad

Subtitle: How to link your Facebook Business Page to the Loan Factory system and start generating inbound leads through paid advertising

Audience: Active Loan Factory loan officers at any experience level who are ready to invest in paid digital lead generation

Estimated Time: 20-30 minutes to complete setup. Allow additional time if you need to create a Facebook Business Page or resolve admin access issues.

Learning Objective: By the end of this lesson, the LO will be able to connect their Facebook Business Page to the Loan Factory system, select an ad template, set a budget and target audience, launch a campaign, and locate new leads in their pipeline.

\---

Step-by-Step Lesson

Lesson Part 1: The Facebook Page Requirement

Before you do anything inside Loan Factory, confirm you have a Facebook Business Page. Log into Facebook, click your profile picture in the top right corner, and look for a Page name in your profile switcher. If you only see your personal profile, you need to create a Business Page. Facebook allows you to manage multiple Pages through your personal account. Your Business Page is what the Loan Factory system connects to - not your personal profile.

Lesson Part 2: Navigate to Facebook Ads in Loan Factory

Log into your Loan Factory account. From the left menu, click Marketing Features, then Facebook Ads. You can also go directly to www.loanfactory.com/facebook_ads. This brings you to the Facebook Ads tool within the system.

Lesson Part 3: Connect Your Facebook Account

On the Facebook Ads Config screen, toggle on "Get leads from Facebook ads." Click "Connect to Facebook Account." Facebook will open an authentication window. Click "Continue as \[Your Name\]." Select "Opt in to current Pages only" and choose your Business Page. Click Continue, then review the permissions, click Save, and click "Got it."

Lesson Part 4: Complete Your Configuration

After the successful connection, the screen will refresh showing three numbered items. Select your Ad account from dropdown 1\.. Confirm the Default Loan Officer for new leads in field 2\.. Click Submit for item 3\.. This links your ad leads to your pipeline.

Lesson Part 5: Create and Launch Your First Ad

Click "Create New Facebook Ad." Choose Lead Form or Website Traffic. Browse the available ad templates and click Select on the one you want. Set your daily budget (\$5-\$10 to start is recommended). Choose your Facebook Business Page. Set your target audience by state, language, and interests. Click Submit. Your ad is now scheduled and will go live.

Lesson Part 6: Check Your Pipeline for Leads

As leads come in from your Facebook Ad, they will appear in your Loan Factory Leads pipeline. The source will be tagged "Automatically Created" so you can identify them. No manual import is needed - the system handles it automatically.

\---

Success Checklist

\- Facebook Business Page exists and you have full admin access to it \- Logged into Loan Factory and navigated to Marketing Features \>\> Facebook Ads \- Toggled on "Get leads from Facebook ads" \- Clicked "Connect to Facebook Account" and completed the Meta authorization flow \- Selected your Facebook Page with "Opt in to current Pages only" \- Granted all requested permissions and clicked Save, then "Got it" \- Selected Ad account and Default Loan Officer and clicked Submit \- Created at least one ad with a template, budget, and target audience \- Confirmed the ad appears in the dashboard with Active status \- Confirmed the Facebook Ads page shows your Business Page name and ID

\---

Common Troubleshooting Section

Problem: Pop-up says "You must create a Facebook page in order to run Facebook ads." Cause: The Facebook account you used does not have full admin control of the Business Page. Fix: Add a second Facebook account as an admin on your Business Page. Use that account to grant full admin rights to your personal account. Then return to Step 2 and reconnect.

Problem: I do not see my Facebook Business Page in the connection window. Cause: You may be logged into the wrong Facebook account, or the Business Page may not exist yet. Fix: Confirm you are logged into the correct Facebook account. If the page does not exist, create it at facebook.com/pages/create.

Problem: My ad was created but shows as "Deleted" in the dashboard. Cause: This is likely a duplicate or test campaign. Check your active campaigns and ensure at least one shows "Active" status.

Problem: I closed the browser tab while the ad was submitting. Fix: Return to the Facebook Ads page in Loan Factory. Check if the ad was created. If it was not, repeat the ad creation process from the template selection step.

\---

Next Recommended Action

After completing this lesson, proceed to the lesson on Reading Your Facebook Ads Dashboard, monitoring lead quality, and following up with leads tagged "Automatically Created" in your pipeline using the Loan Factory contact and communication tools.

\---

4\ SALES AND MARKETING 101 TO 601 PLACEMENT

Recommended Class: 401 Content and Marketing

This lesson belongs in the 401 Content and Marketing class.

Here is why. The 401 level is where Loan Officers move from understanding lead generation concepts to actually executing paid and organic marketing campaigns. Setting up Facebook Ads inside the Loan Factory system is a direct execution task - it requires a platform account, a Facebook Business Page, a budget decision, an audience strategy, and creative (template) selection. It is not a foundational concept (101) or a borrower conversion skill (201). It is not about referral partner outreach (301). It is a content distribution and paid marketing execution skill.

At the 401 level, LOs are expected to have their Loan Factory profile set up, their basic digital presence established, and their marketing awareness developed enough to allocate budget toward ads. This Facebook Ads setup lesson fits perfectly as a core 401 execution module that teaches LOs how to activate one of the most scalable paid lead generation tools available inside the system.

A secondary argument could be made for 301 Referral Partner Growth if the LO is using ad campaigns to generate realtor partnership leads, but the primary application - generating direct borrower leads from paid Facebook ads - is squarely a 401 activity.

\---

5\ AI ADVANTAGE PLACEMENT

How This Lesson Connects to AI-Assisted Marketing

This lesson is a natural entry point for introducing AI tools into the LO's marketing workflow. Once the technical connection is made and the ad system is live, AI can help the LO do more with less effort at every stage of the campaign lifecycle.

Plan Facebook Ad Copy

An LO can use an AI tool to generate multiple variations of ad headline and body copy for different loan products. For example, they could prompt AI with: "Write three short Facebook ad captions for a refinance campaign targeting homeowners in California who may benefit from lower rates. Keep it under 90 words and include a soft call to action." The AI produces options the LO can paste into the ad template's primary text field.

Create Audience Ideas

AI can help LOs think through Facebook targeting before they sit down in the system. An LO could ask: "What Facebook interest categories and demographic filters would best reach first-time homebuyers aged 28 to 40 in Texas?" The AI

response gives them a starting point for their detailed targeting fields in the ad setup.

Draft Follow-Up Messages

When leads come in from a Facebook ad and land in the Loan Factory pipeline tagged "Automatically Created," AI can help the LO write the first contact message. Prompt example: "Write a friendly, non-pushy opening text message for a mortgage lead who just submitted their info through a Facebook ad. They are interested in a home purchase. Keep it under 50 words." This connects the marketing lesson directly to the borrower conversion skills in 201\.

Create a Simple Campaign Checklist

AI can help an LO build a weekly ad management routine. Prompt example: "Create a simple 5-step weekly checklist for a loan officer who is running one Facebook ad campaign on a \$7/day budget. Include checking lead volume, reviewing cost per lead, and deciding when to pause or adjust the ad." This teaches the LO to use AI as an ongoing operational support tool, not just a one-time setup assistant.

Repurpose the Training into a Short Video Script

AI can take this document or any lesson summary and turn it into a narrated video script the LO can record for their own team or clients. Prompt example: "Turn this 4-step Facebook Ads setup summary into a 90-second screen recording script. Use a friendly, confident tone. Start with why it matters and end with a call to action." This connects directly to Section 6 of this package.

\---

6\ SHORT WALKTHROUGH VIDEO SCRIPT

Format: 90-Second Screen Recording Script

\---

\[HOOK - 0:00 to 0:08\] "If you want Facebook leads flowing directly into your Loan Factory pipeline automatically - without manually exporting anything - this is the setup you need to do. It takes about 10 minutes. Let me show you."

\[WHAT WE ARE DOING - 0:08 to 0:18\] "We're going to connect your Facebook Business Page to the Loan Factory Facebook Ads tool. Once it's connected, you can launch an ad in minutes and watch leads come in tagged automatically in your pipeline."

\[STEP-BY-STEP NARRATION - 0:18 to 1:10\]

"First, in your Loan Factory account, click Marketing Features in the left menu, then Facebook Ads. Or go directly to loanfactory.com/facebook_ads."

"On the Facebook Ads Config screen, toggle on 'Get leads from Facebook ads,' then click 'Connect to Facebook Account.'"

"Facebook will open an authorization window. Click 'Continue as \[your name\].' Then choose your Business Page - select 'Opt in to current Pages only' - and click Continue."

"Review the permissions, click Save, then click 'Got it.' You're connected."

"Back in Loan Factory, you'll see your account is now linked. Select your Ad account, confirm the Default Loan Officer, and click Submit."

"Now click 'Create New Facebook Ad,' pick a template - Lead Form works great for capturing contact info directly on Facebook - set a budget of \$5 to \$10 a day to start, choose your target state and audience, and hit Submit."

"Your ad is scheduled and live."

[COMMON MISTAKE WARNING - 1:10 to 1:22] "One thing to watch out for: if you get a pop-up saying you need to create a Facebook page, it means the account you used doesn't have full admin access to your Business Page. Check the troubleshooting guide in the LO Development Platform to fix this in about five steps."

[CLOSING NEXT STEP - 1:22 to 1:30] "Once leads start coming in, they'll show up in your Loan Factory pipeline tagged 'Automatically Created.' From there, your next step is follow-up. Head to the next lesson to see exactly how to do that."

\---

7\. PLATFORM RESOURCE CARD

Title: Connect Facebook Account & Set Up Facebook Ads

Category: Marketing Tools | Paid Advertising | Lead Generation

Short Description: Learn how to connect your Facebook Business Page to the Loan Factory system and launch your first Facebook Lead Ad. Leads flow automatically into your pipeline - no manual import needed.

\---

8\. QUIZ

Quiz: Connect Facebook Account & Set Up Facebook Ads 5 Questions | Answer Key Included

\---

Question 1 What type of Facebook account is required to connect to the Loan Factory Facebook Ads tool?

A) A personal Facebook profile B) A Facebook Business Page C) A Facebook Marketplace account D) Any Facebook account

Correct Answer: B Explanation: The Loan Factory system requires a Facebook Business Page. A personal profile alone will not work and will trigger a connection error.

\---

Question 2 Where do you find the Facebook Ads tool inside the Loan Factory system?

A) Dashboard \>\> Tools \>\> Facebook B) Marketing Features \>\> Facebook Ads \>\> Connect with Facebook C) Loans \>\> Marketing \>\> Social Media D) Resources \>\> Marketplace \>\> Facebook

Correct Answer: B Explanation: The navigation path is Marketing Features \>\> Facebook Ads \>\> Connect with Facebook. You can also go directly to www.loanfactory.com/facebook_ads.

\---

Question 3 After the Facebook connection succeeds, what are the three numbered actions you must complete in the Loan Factory system?

A) Choose a template, set a budget, click publish B) Select your Ad account, confirm the Default Loan Officer, click Submit C) Enter payment info, link your page, choose an audience D) Verify your email, sync your contacts, set your schedule

Correct Answer: B Explanation: The post-connection screen shows three numbered callouts: (1) select Ad account, (2) select Default Loan Officer for new leads, and (3) click Submit.

\---

Question 4 What does it mean when a new lead in your Loan Factory pipeline shows the source tag "Automatically Created"?

A) The lead was manually imported from a spreadsheet B) The lead came from a Loan Factory referral partner C) The lead came in through your connected Facebook Ad campaign D) The lead was created by the LO Support team

Correct Answer: C Explanation: Leads generated from connected Facebook Ad campaigns are automatically delivered to the Loan Factory pipeline and tagged "Automatically Created" to identify their source.

\---

Question 5 What should you do if you receive the error pop-up: "You must create a Facebook page in order to run Facebook ads"?

A) Create a brand new Facebook account and start over B) Contact Facebook support to unlock your account C) Add a second Facebook account with full admin access to your Business Page, use it to grant admin rights to your personal account, then reconnect D) Upgrade to a Facebook business subscription

Correct Answer: C Explanation: This error means your personal Facebook account does not have full administrative control over the Business Page. The fix requires temporarily adding a second account as admin, using it to grant full control to your personal account, then returning to the connection process.

\---

9\. FINAL IMPLEMENTATION NOTE

To Jeremy McDonald:

Here is what should be added to the LO Development Platform based on this source document.

Recommended Route LO Development Platform \>\> Sales and Marketing \>\> 401 Content and Marketing \>\> Digital Advertising \>\> Facebook Ads Setup

Recommended Category Marketing Tools | Paid Advertising | Lead Generation

Recommended Tags Facebook Ads, Lead Generation, Marketing Features, Facebook Business Page, Ad Templates, Pipeline, Paid Advertising, Budget Setup, Target Audience, Troubleshooting, 401 Marketing

Recommended Related Lessons The following lessons should be listed as related or "what to take next" alongside this module: (1) How to Read Your Facebook Ads Dashboard - this is referenced in the document but not yet created as a lesson; (2) Following Up with Pipeline Leads Tagged "Automatically Created"; (3) Setting Up Your Loan Factory Marketing Profile (prerequisite); (4) Google Reviews Setup inside Marketing Features (companion lesson at the same level).

Missing Screenshots or Source Material Needed

The following items are either incomplete or would strengthen the training and should be confirmed with the IT Team or Marketing:

\- ■■ **Needs Confirmation:** The document shows a step where the LO selects a target audience with fields for State, Language, and Detailed Targeting, but there are no written instructions explaining what values to enter or how to choose them. A companion note or example targeting setup for a typical Loan Factory market would be helpful.

\- ■■ **Needs Confirmation:** The document references that the LO should "go to their Facebook Ads Manager" to check ads directly, but no screenshot or link to that external tool is included. A brief note on where to find the Facebook Ads Manager would help LOs who want more data than what the Loan Factory dashboard shows.

\- ■■ **Needs Confirmation:** The ad creation flow shows a field for "Media" and "Description" and "Primary Text" - but there is no written instruction explaining whether these are auto-filled by the template or must be customized by the LO. This should be clarified before the lesson goes live.

\- ■■ **Missing:** There is no lesson yet on what to do after the lead arrives in the pipeline. This is referenced as the "next step" throughout the document but does not exist yet. A follow-up lesson on immediate lead response using Loan Factory communication tools would complete this learning path.

\- **Missing Screenshot:** The document shows a "Receive a notification to your cell phone when NEW lead is created" checkbox in the audience setup screen but does not explain how to configure it. A short note or screenshot showing how this works would be a useful addition.

\- **Note on Support Contact:** The troubleshooting section references emailing it.dept@loanfactory.com. Confirm this is the current and active support email before publishing.
